**Welcome Letter**

Study Skills I
-Advanced Cybersecurity-

I am excited to have you in this class and know that we will have an amazing experience together this semester!

In Study Skills I, you will be rehearsing Advanced Cybersecurity concepts and terminology in the preparation for the end of pathway assessment, the CompTIA Security+ 601 Exam.
Students you will be reintroduced to various forms of information security technologies, software, and applications.
We will cover the internal and external threats to and design, how to enforce security policies, how to protect an organization's information, and a broad range of security disciplines. We will practice taking the Sec+ 601 tests together and individually to achieve readiness for your end of pathway test.

Throughout the course we will cover professional communication skills and practices, problem-solving, ethical, and legal issues, and the impact of effective presentation skills are enhanced in this course to prepare students to be college and career ready.

Employability skills are integrated into activities, tasks, and projects throughout the course standards to demonstrate the skills required by business and industry.

My name is Don Welch, and I would like to welcome you to Study Skill I w/ Advanced Cybersecurity! My goal is to prepare you for the Information Technology pathway, whether it is Cybersecurity, Computer Networking, or Computer Science.

Prerequisite: Students enrolled in this course should have successfully completed Introduction to Hardware Technology.

Name: Don Welch
Room: 247 B-Hall
