

Dear Parents,

I would like to take this opportunity to introduce myself to you all. My name is Ms. Fredenberg and I will be your son or daughter's 7th grade Math teacher. This is my 5th year teaching at Langford Middle School. In addition to teaching at Langford, I have been on committees to revise and edit district wide math curriculum the past three years in 6th thru 9th grade. Also, I am IB and AVID certified. IB stands for international Baccalaureate Program which is school wide and AVID stands for Advancement Via Individual Determination. You will see evidence of both of these programs in students work and vocabulary within the classroom. IB Learner Profiles and AVID cornell notes will be used daily in the classroom. To add to the IB mindset in class I have traveled and lived in Africa and Europe.

This year your child will be challenged to grow und master Mathematical concepts needed to thrive in the real world. I will be providing your child with supports and extensions to different concepts to reach each of your children where they are in Math. I will also be connecting math standards with science and social studies. My ultimate goal for each child this year is to not only master the 7th grade math standards, but show them how the concepts they are learning are needed in different areas of life once they enter the real world. I look forward to making contact with each of you so we can work together to grow your child in Math concepts this year.

Sincerely,

*Ms. Fredenberg*
