Students and Families,

Welcome to Flight Operations !! I am excited about the opportunity to get to know you, and I look forward to a productive learning school year. Please read the information below to acclimate yourself with the procedures and expectations for this course.

## **FLIGHT OPERATIONS I (2024 - 2025) SEMESTER 1**

### **COURSE DESCRIPTION:**

**Flight Operations I** is a course that provides a foundation, which enables the student to apply the basics of aircraft navigation and utilize efficient communication methods for safe aircraft operations. A thorough overview of Navigation and Communication is essential to the safe operation of aircraft within the airspace system. Students will explore the types of aircraft operating in today's aviation environment. The prerequisite for this course is Fundamentals of Aerospace.

Facilitating such evolution requires a classroom culture that values good questions and offers students opportunities to refine their questions and strategies. As a result, students will become increasingly proficient at posing questions that seek relevant evidence, work to refine an engineering problem, or challenge the feasibility of a design.
