Accessible Library Media Centers

State Standards requires school library media centers to operate on an open schedule.

Open concept includes:

The library media center is open to individual students, small groups of students and faculty at all times.

Cooperative planning between the media specialist and teachers shall help optimize utilization of the available resources.

Large group activities shall be planned and scheduled by the teacher for varying times, and lengths of time, to fit a particular curricular need. Teachers are not to schedule the same block of time week in and week out.

Richmond County schools shall operate using the open concept, with the library media center existing to serve the learning needs of the students and the staff of the school.

Yearly closing of the library media center for periods of time at the beginning and end of the school year IS NOT permitted. While checkouts may be limited for the purpose of inventory, the center must stay open for student and faculty use.

Conducting meetings in the library media center at any time during the school day is permissible only so long as the center is not closed to student use.

Due to the library media center operating using the open concept, with the library media center existing to serve the learning needs of the students and the staff of the school, rigid scheduling of classes IS NOT considered consistent with this policy and is not to be used in Richmond County schools.

It is policy that the teacher remains with his/her class.
