2019 Cyber Summer Camp at Augusta University

GenCyber operates on 3 primary goals:

- Increase interest in cybersecurity careers and diversity in the cybersecurity workforce of the nation.
- Help all students understand correct and safe online behavior.
- Students receive direct hands-on experiential time using Raspberry Pi computers and building robots.

When: June 22-29, 2019

Where: Augusta University, Augusta, Georgia
Cost: FREE. Registration opens March 2019

Who: Open to rising high school juniors and seniors.

AUGUSTA UNIVERSITY

What will you learn? The residential cyber camp at Augusta University exposes high school students to potential careers and current issues in cybersecurity. The program is available to 36 students regardless of their knowledge level or previous experience with cybersecurity. This week-long camp features 40 hours of hands-on instruction in computer programming, wireless robot control and the fundamentals of online safety. Students will also have the opportunity to visit NSA Georgia and meet cybersecurity professionals.

Limited space available. Applications available in March.
