

## Steps to Make a Video Private

1. **Sign in to YouTube Studio:** Open your web browser and go to [studio.youtube.com](https://studio.youtube.com) or use the YouTube Studio app on your mobile device.
2. **Go to Content:** From the menu on the left (or bottom on mobile), select **Content**.
3. **Select a Video:** Point to the video you wish to update.
4. **Change Visibility:** Click the down arrows under the **Visibility** column for that video.
5. **Choose Private:** Select **Private** from the dropdown menu.
6. **Save Changes:** Click the **Save** button to apply the new privacy setting.

## How to Share a Private Video

- **Invite specific viewers:** When in the privacy settings, you can click a button to invite specific people to watch your private video.
- **Enter their email addresses:** You will then be able to enter their email addresses.
- **Notify them:** The invited users will receive an email notification, but they must sign in to a Google account to view the video.

This video demonstrates how to invite specific people to watch a private YouTube video:

## Difference Between Private and Unlisted

- **Private:** Only you and the specific people you invite by email can view the video. The video will not appear in search results or on your channel's video list.
- **Unlisted:** Anyone who has the video's link can view it, but it won't show up in public search results or on your channel's public videos tab.

This video explains the difference between private and unlisted video settings:
