

## Background Research

This entry follows the Research Question page in your child's Science Fair Log Book.

It consists of 10 facts that your budding young scientist learns while researching his or her topic. These 10 facts are to be recorded in the Science Fair Log Book. Remember to write down all sources of information used to glean this information. These sources will become the bibliography and will be documented on the Bibliography page in your child's Science Fair Log Book (see Bibliography Guide on my web page). Also remember to write the date each time your child makes an entry in his or her Science Fair Log Book!
