(Online Assessment Guide only)

Purpose of the Guides

Online Study Guides are available as a tool for **students and parents** to understand more about the Georgia Milestones assessment and how to prepare students to participate in a Milestones Assessment. The Online Study Guides contain information about the core content and skills covered in Georgia's K-12 Mathematics Standards for each grade level and course. Practice sample items are included in the guides for every unit of study and each sample item is fully explained and provides rationale of why each answer is correct or incorrect.

Online Assessment Guides are provided to acquaint Georgia **educators** with the structure and content assessed on the Georgia Milestones assessment. In addition to the units of study and sample practice items included in the student and parent version of the guides, the Online Assessment Guides provide educators with additional testing resources such as test blueprints and Achievement Level Descriptors (ALDs) and additional information about each practice item including alignment to standards, learning objectives, ALD levels, and Mathematical Practices.

How to Access the Online Study & Assessment Guides

www.gaexperienceonline.com/

From the Experience Online Testing Georgia page, click the "Test Practice" button.

Click "Online Tools Training" for access to the EOG or EOC online guides.

Parents and students can click "EOG/EOC Online Study Guide" to display the desired grade level or course.

Example of student and parent view.

Educators can click "EOG/EOC Online Assessment Guide" to display the desired grade level or course.

Example of educator view.
