Lion's Club Preventative Vision Screenings

Children around the world are affected by a range of eye diseases and conditions, impacting their abilities to learn and socialize when left unaddressed. As they grow, poor vision may impact their academic progress and their ability to gain employment. According to the World Health Organization, an estimated 19 million children are visually impaired. Of these, 12 million children are visually impaired to due refractive errors, a condition that could be easily diagnosed and corrected. Another 1.4 million are irreversibly blind and in need of various types of adaptation assistance.

Lion's Club will be providing **FREE** preventative screenings on Thursday, September 12, 2019. Please complete the consent form below and return to your child's teacher by Tuesday, September 10, 2019.

Parent Consent Form for Free Vision Screening by Hephzibah Lion's Club

September 12, 2019 at Hephzibah Elementary School

Student's Name: _____
