About Us

The Renewal Group is dedicated to providing behavioral health services for families and children. Our philosophy consists of identifying the community services and support that a family or individual may need. Our service is designed to adhere to those needs of families, school, or communities. The Renewal Group provides these services by working as a team with a collaboration of other resources within the community. Certified mentors, therapeutic support staff, mobile therapy, and community support specialists cater to the needs of the individual and family.

Our Mission

The Renewal Group exists to assure and provide access to the higher quality community-based services and supports available to meet the behavioral and mental needs of children and adolescents as well as adults.

The Renewal Group adheres to the best practice standards to ensure effective and culturally competent care to promote solid and lasting positive behaviors. The Renewal Group values and promotes self-determination, protect human rights, and supports the needs of the individuals. This critical mission is accomplished by working in partnership with other state agencies, individuals, families, providers, and communities.

- Long-term Services
- Psycho Evaluation Services
- Family Support and Education
- Community Integration

"Rebirth of Hope for Families"

Our Approach

Individuals will be assigned to a qualified team of mental health personnel. Members of the team will meet with individuals in their respective communities; home visits may be adequate and frequent. An individual that is engaged in The Renewal Group's treatment could lead up to and exceed 45 minutes. Treatment is consistent and individual driven and is available to individuals for as long as they need it. A criterion for mastery of treatment is established based on individual needs. Individuals who meet criteria for mastery of their treatment could engage in after care to provide optimal support and continued care.

The Renewal Group does not conduct research on any of their clients. Outcome measurements are collected and analyzed to ensure that the best quality treatment is provided.
