

# The Water Cycle

# The Water Cycle

# Evaporation

- Sun shines on water
- Water is heated
- Water turns into vapor
- Vapor enters the air

# Condensation

- Water vapor cools
- Condenses into droplets
- Droplets create clouds

**BACK**

# Wind

- Wind moves clouds to new places

**BACK**

# Precipitation

- Air cannot hold more water
- Water falls to the ground
- Rain, snow, sleet, hail

# Runoff

- Rain falls to ground
- Runs downhill
- Travels to new places

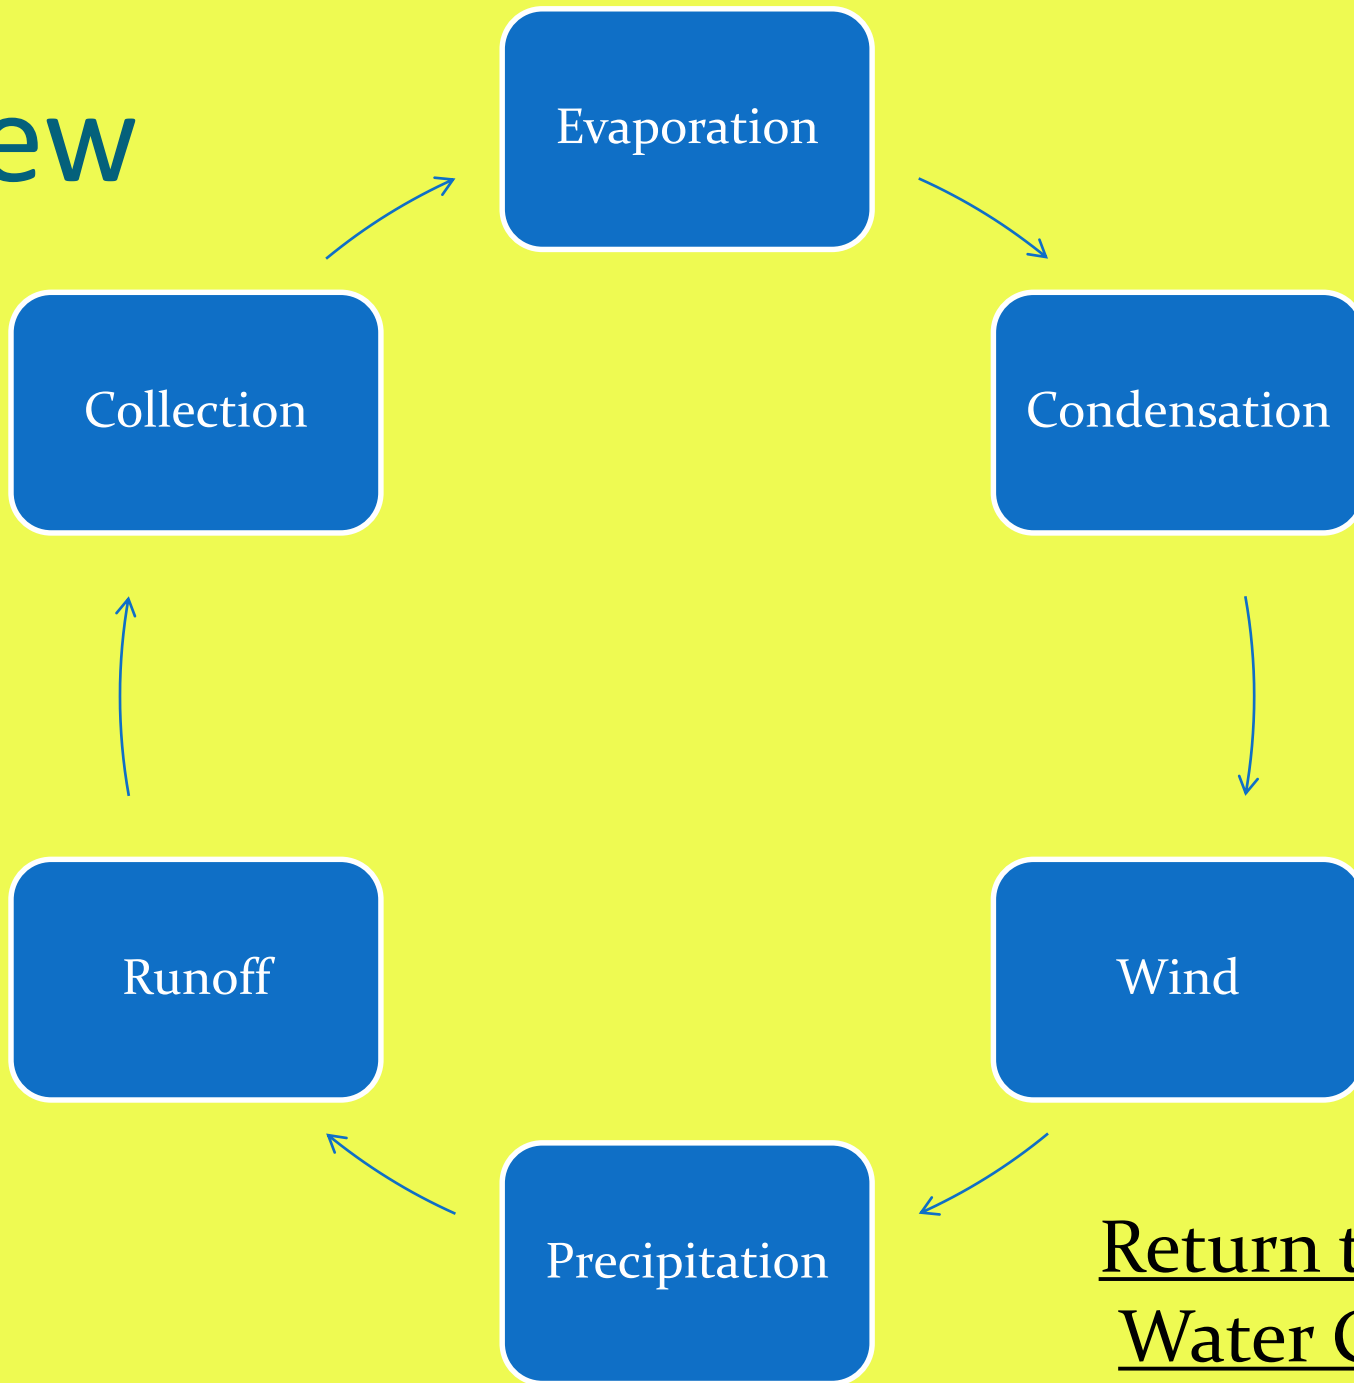

# Collection

- Collects
- Lakes, rivers, oceans
- Groundwater
