

FROM THE DESK OF WILLIAM P. SMITH

PRINCIPAL OF WESTSIDE HIGH SCHOOL

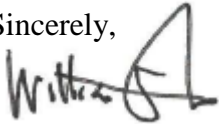

October 15, 2020

Dear Parents and Guardians,

In an effort to keep you informed, I wanted to let you know about a gas leak that occurred at our school this morning. Construction workers cut the line and immediately notified us. The school was evacuated immediately and safely. No students or staff were involved or impacted by the leak. Augusta Fire Department, Atlanta Gas Light, Richmond County School System public safety and facilities teams responded and were able to shut off the valve without incident. Once cleared for entry, students returned to class. Our students were able to remain socially distanced throughout the evacuation and reentry process. School will continue to operate normally.

Thank you for your continued support of Westside High School and the Richmond County School System.

Sincerely,

Mr. William Smith, Principal
Westside High School
