

ACADEMY OF RICHMOND COUNTY HIGH SCHOOL

ARC Narrative:

- Currently at ARC, as part of the Phase V Building Program, the new 36 Classroom Wing is under construction. The focus of this new wing is Science, Math and Technology. Creating this space in a new wing allows for the larger lab spaces to be built to new standards in lieu of having to retrofit these space into the older building. This new wing includes 4 STEM / Digital Technology Classrooms, 3 Computer Labs, 9 Science Labs and 20 Math and Science Classrooms.
- The Phase VI plan for ARC is to complete a Historical Renovation of the original 3-Story Classroom wing. This includes a complete renovation of all interior spaces along with reconfiguration of many existing classrooms to increase classrooms sizes to comply with district standards for high school classrooms. The project includes Exterior Historical Restoration and structural improvements. Renovations to the Media Center, Kitchen and Cafeteria are also included.
- Completion of the Phase V Classroom Wing and the reconfiguration of classrooms in Phase VI will bring the capacity of ARC to 1,800 students.
