

## **Policy**

### **Internet Acceptable Use**

### **Descriptor Code: IFBG**

It is the policy of the Richmond County Board of Education that employees and students should be furnished educational opportunities and resources to have access to Internet-based instructional programs and administrative services. The primary purpose and mission of the Richmond County Board of Education is to educate students to become lifelong learners and productive citizens in the 21st Century. Technology plays a role in this mission by providing quality programs, information and learning activities along with support and services to improve student learning and enhance instructional and administrative effectiveness. The instructional use of interactive computer and web-based technology will prepare students for the future. Technology includes computer hardware, software, local and wide area networks and access to the Internet. Due to the complex nature of these systems and the magnitude of information available via the Internet, the Richmond County Board of Education has adopted procedures regarding acceptable use to ensure that the technology users share in the technology resources in an effective, efficient, ethical and lawful manner. Particular attention should be given to ensuring that students are not granted access to anything other than educational and instructional materials and resources.

The Richmond County Board of Education is committed to: (a) preventing user access over its computer network to, or transmission of, inappropriate material via Internet, electronic mail, or other forms of direct electronic communications; (b) preventing unauthorized access and other unlawful online activity; (c) preventing unauthorized online disclosure, use, or dissemination of personal identification information of minors; and (d) complying with the Children's Internet Protection Act [Pub. L. No. 106-554 and 47 USC 254(h)]. Each user must follow the Richmond County School System Internet Acceptable Use Procedures found in the Richmond County Board of Education Code of Student Conduct and Discipline.

Procedures have been adopted to address Internet safety, which include:

- (a) Access by minors to inappropriate matter on the Internet and World Wide Web
- (b) Safety and security of minors when using electronic mail, instant messaging, chat rooms and other forms of direct electronic communications
- (c) Unauthorized access, including so-called "hacking," and other unlawful activities by minors online
- (d) Unauthorized disclosure, use and dissemination of personal information of minors
- (e) Restricting minors' access to materials harmful to them

The Superintendant is authorized to designate certain persons in the School System who will be allowed to disable the blocking or filtering measure placed on the computer system during the use by an adult to enable access for bona fide research or other lawful purposes.

## **Procedures**

### **Internet Acceptable Use**

**Descriptor Code: IFBG**

#### **Internet Acceptable Use Procedures**

The Acceptable Use Procedures apply to all students, faculty, staff, employees and visitors (both adults and minors) of the Richmond County School System. All users of the district wide area network and/or other electronic informational services must maintain strict compliance with all applicable ethical and legal rules and regulations regarding access. The school system reserves the right to monitor, access, and disclose the contents of any user's files, activities, or communications.

#### **Availability of Access:**

The Internet will be available to users for instructional and administrative purposes. The electronic information available to users does not imply endorsement by the Richmond County Board of Education. The use of the network is a privilege, not a right, and misuse will result in disciplinary actions, including cancellation of those privileges.

#### **Security:**

Users must maintain appropriate passwords to obtain access to the network. Login information, user names, and passwords are confidential and it is the responsibility of the user to safeguard that information. Passwords should be at least 8 characters and should contain a number and a capital letter. No user should login with another user's information.

While the Internet is an extremely valuable tool for educational research, information is accessible that may not be appropriate according to community, school, or family standards. The Richmond County Board of Education provides an Internet filtering system which blocks access to a large percentage of inappropriate sites. Specifically, as required by the Children's Internet Protection Act, visual depictions of material deemed obscene or child pornography, or any material deemed to be harmful to minors will be blocked by the web filtering system. Even though most objectionable sites are blocked, various entities create new inappropriate sites daily. If a questionable site or information is encountered, the same should be reported to the school's Media Specialist or to the Media and Instructional Technology Department. Staff members in Media and Instructional Technology will make every effort to block the site as quickly as possible.

#### **Internet Safety:**

Internet safety is a great concern of the Richmond County Board of Education. It shall be the responsibility of all educators of the Richmond County School System, including administrators, instructional supervisors, principals, teachers, media specialists, technology specialists, guidance counselors, instructional paraprofessionals and any other personnel having access to the online computer network for instructional purposes, to supervise and monitor usage of the online computer network and access to the Internet in accordance with this policy and the Children's Internet Protection Act (CIPA), as much as is practical.

A series of age appropriate Internet Safety courses will be taught to all students in the Richmond County School System to provide education on appropriate online behavior, including interacting with other individuals on social networking websites and in chat rooms, safety and privacy, as well as cyberbullying awareness and response. School personnel have the discretion to provide such other training or to implement such other curricula, provided that such training or curricula meet the requirements of CIPA, as may be
